## **Task 1 - Cybersecurity**

### **Common Dorks to be Used**

#### **To find public documents by file type:**

- filetype:pdf
- filetype:xlsx
- filetype:docx

#### **Common login/admin page dorks:**

- inurl:admin
- inurl:login
- intitle:"admin panel"
- inurl:"/administrator"
- inurl:"wp-login"

#### **To find exposed backup or config files:**

- intitle:"index of" backup
- intitle:"index of" config
- filetype:bak
- filetype:env
- filetype:cfg
- filetype:sql
- inurl:backup
- inurl:config

#### **To Search for log files or error messages:**

- filetype:log
- intitle:"index of" log
- inurl:error
- intext:"Fatal error"
- intext:"Warning:"

#### **To Find exposed email addresses:**

- intext:"@gmail.com"
- intext:"@example.com"
- filetype:txt intext:"email"

- filetype:pdf "email"

### **To Find exposed .git directories or .env files:**

- inurl:.git
- intitle:"index of" ".git"
- inurl:.env
- filetype:env

## **Some more special Dorks in all category**

### **Uncovering Secret or Sensitive Files**

- intitle:"index of" "secret"
- intitle:"index of" "restricted"
- intitle:"index of" "confidential"
- intitle:"index of" "private"
- intitle:"index of" "backup"
- inurl: "/secret/"
- inurl: "/private/"
- inurl: "/hidden/"
- inurl: "/restricted/"
- inurl: "/confidential/"
- inurl: "/tmp/"
- inurl: "/data/"
- filetype:bak OR filetype:old OR filetype:backup
- filetype:env OR filetype:log OR filetype:sql
- ext:txt intext:"not for distribution" | intext:"internal use only" | intext:"do not share" [145](#)

---

### **Finding Exposed Links and Hidden Endpoints**

- inurl: "/admin/secret"
- inurl: "/dashboard/hidden"
- inurl: "/panel/hidden"
- intitle:"Dashboard" inurl:panel
- site:\*.example.com (finds subdomains and possibly hidden links) [5](#)
- site:\*.example.com/panel -www (finds panels, excluding the main domain) [5](#)
- inurl: "/test/" | inurl: "/dev/" | inurl: "/staging/"
- inurl: "/debug/" | inurl: "/sandbox/"

---

### **Searching for Leaked Credentials or Sensitive Information**

- ext:txt password | ext:log password
- filetype:xls intext:"password"
- filetype:csv intext:"secret"
- filetype:pdf intext:"confidential"
- filetype:env intext:"SECRET\_KEY"
- intext:"API\_KEY=" | intext:"SECRET\_KEY=" | intext:"DB\_PASSWORD="

- inurl:config intext:password
  - inurl:wp-content/uploads/ intext:backup[145](#)
- 

### Discovering "Not for Public" or Internal Use Files

- inurl:.gov "not for distribution" | confidential | "employee only" | proprietary | "top secret" | classified | "trade secret" | internal | private filetype:txt[5](#)
  - allintext:"confidential internal memo"
  - filetype:pdf "internal use only"
  - filetype:xlsx "do not distribute"
- 

### Locating Exposed Source Code or Version Control

- inurl:.git
  - intitle:"index of" ".git"
  - inurl:.svn
  - inurl:.hg
  - intitle:"index of" ".env"
  - inurl:".env"[145](#)
-
